It is important that our patients and we have the same health objectives concerning chiropractic care. Regardless of what a disease or condition is called we do not offer to treat it. Our only practice objective is to eliminate a major interference to the expression of the body's internal wisdom. Our only method is specific adjusting to correct vertebral subluxations. We believe that the greatest Doctor is the one already inside each of our patients and we only help to maximize that inherent healing power, without using drugs or surgery. Your signature verifies that the information given in this form is complete and correct and that you accept for your child, if eligible, chiropractic care on this basis.
